GUIDELINES FOR DRIVEWAYS

1. Clear all brush less than six (6) inches in diameter at least fifteen (15) in from the edge of the road and the length of the property to ensure an adequate sight distance triangle for driveway and uniformity.
2. Drainage pipes (eighteen (18) inches as per permit) will be required unless adequate provisions are taken to ensure that no storm water/runoff encroachment upon the public road can occur.
3. Final approval will be issued upon the submission of an acceptable driveway profile.
4. Any waiver of driveway requirements as stipulated in the SALDO must be issued by the Board of Supervisors at a regularly scheduled meeting. Please refer to pages 5-9 and 5-10 in the SALDO
